

Engineering Runbook — AI-Assisted Version

Section 1: Overview

This document covers deployment and operational procedures for the engineering team. It should be read in conjunction with the architecture overview and on-call handbook.

Section 2: Pre-Deployment Checklist

1. Verify all CI/CD pipelines are green.
2. Confirm staging environment is healthy.
3. Review migration scripts with tech lead.
4. Notify #platform-releases channel.

Section 3: Deployment Steps

Execute the following commands in order on the deployment server. Ensure you have the correct IAM role before proceeding.

Section 4: Rollback Procedure

If errors are detected post-deploy, revert immediately using the feature flag. Contact the on-call engineer and file a post-mortem within 24 hours.

Section 5: Contact

Platform team: platform@company.com | On-call: PagerDuty escalation policy PLAT-001

Appendix A: AI Processing Notes

For AI-assisted documentation review, see the processing guidelines in Appendix B.
